Road Systems

MCrafterzz edited this page on Oct 12, 2018 · 3 revisions

Road Systems

This is your base of all your roads, intersections and other road related objects. This will be the parent of all those. To create a road system go to Create `GameObject > 3D Object > Road System`. When created this will automaticly create a Global Settings object for you.

`[Reset]` Removes all child objects so be careful with this

`[Convert To Mesh]` Converts the whole road system to a mesh object which meens that it no longer can be edited. Improves performance.

Pages 12

Tutorials:

- Getting Started/Controls
- Using The Creation Gui
- Using The Tool in SRP

Customization:

- Roads
- Road Segments
- Prefab Lines
- Intersections
- Roundabouts
- Road Systems
- Traffic Lights
- Settings
