`[Green Non-active Material]` The material of the green light when deactivated. Is Transparent Green by default.

`[Yellow Active Material]` The material of the yellow light when activated. Default is Yellow.

`[Yellow Non-active Material]` The material of the yellow light when deactivated. Is Transparent Yellow by default.

`[Red Active Material]` The material of the red light when activated. Defaults to Red.

`[Red Non-active Material]` The material of the red light when deactivated. Default is Red.

Timing

All values are in seconds.

`[Green Time]` How long should the traffic light be green before switching to yellow? Is 30 by default.

`[Yellow Before Red Time]` Determines how long the light should be yellow before turning red. 5 is default.

`[Red Time]` Determines how long the light should be red before turning yellow. Defaults to 60.

`[Yellow Before Green Time]` How long should the traffic light be yellow before turning green? Default is 1.

`[Start Colour]` Determines which colour the traffic light should have when the game is started. Can be Green, Yellow Before Red, Red or Yellow Before Green. Default value is Green.

`[Time Since Last Transition]` Defaults to 0. Defines the time since the last colour change, change this sync multiple light together, for example: If red time is 30 and this is 15 then it will take 15 seconds before the light turns yellow.
